GlobalCallback – International Callback Anywhere In The World

GlobalCallback service is a reliable and easy to use phone service that offers extremely economical US rates to people living and working overseas.

GlobalCallback allows people overseas to enjoy the value and cost-savings created by the highly competitive U.S. long-distance industry. By accessing a US dial tone and placing calls as if they were made in the US, individuals and companies with locations abroad save up to 70 percent on their international calls. GlobalCallback service is approved by the US Federal Communications Commission. It offers competitive US rates by avoiding the expense of international direct dialing through the local monopoly telephone company.

How Does GlobalCallback Work?

1. Callers dial a phone number that has been assigned by GlobalPhone, using their usual dialing procedures. The caller lets the phone ring once and then hangs up. The caller is not charged for this portion of the call because the call is not answered.
2. Within seconds after hanging up, the system calls back. Upon answering, the caller may dial his or her destination number. Only if the party at the destination number has answered the call does GlobalPhone bill for the call.

Special Features

- **Change your callback number**—You can easily change your Callback number from any location so that it can ring at a new number.
- **Extensions and Front Desk Operators**—If your office phone does not have a direct number, the system can dial the extension after connecting to the main number. Also, in the event that you are in a hotel room or office with a front desk operator, you may record a message to a switchboard operator instructing the operator where to transfer the call.
- **Calling Card Access** – Callback customers receive complimentary calling card service. Customers can make phone calls from any phone in over eighty countries using GlobalPhone's network of toll-free access numbers.
- **Voice Mail** – Send and retrieve voice mail messages from your personal account.
- **Conference Calling** – Conference up to 16 other people in your conversations.
- **Speed Dial** – Speed dial up to 100 personal numbers.
- **Multi-Lingual Voice Prompts** – Select one of twelve languages for you voice prompts.

Customers save money because all calls are originated in the U.S. The entire process adds minimal time to normal dialing. GlobalCallback is fast, easy, and dramatically lowers expenditures.
