

GlobalConference

Audio & Web Conferencing Solution

Empower Your Group Productivity with GlobalConference

Experience Full-Featured Web Conferencing with GlobalConference

GlobalConference is an online audio and web conferencing system that allows for real time on-demand conferencing and collaboration through a feature rich web-based interface.

GlobalConference allows you to strengthen your company and departmental meetings by using the power of the web to deliver advanced features such as application sharing, chat, Q&A, and recording/playback capabilities.

No need to email participants presentations and documents prior to your conference calls. Simply upload them to GlobalConference prior to the conference or using the application sharing tool during your meeting to ensure that everyone is on the same page.

Easy Point and Click, Web-Based Interface

GlobalConference provides an intuitive web-based interface for both moderators and participants, making conference scheduling and management a snap for moderators, and providing an informative and fluent experience for participants.

The GlobalConference interface provides easy one-click access to many of the available conferencing features. So easy, that any employee can quickly learn how to schedule and manage their own audio and web conferences directly from their desktop. With the optional Microsoft Outlook® Integration feature, moderators can automate certain routine meeting functions such as scheduling and inviting participants and sending email invitations directly from their Outlook client.

Participants will find that easy-to-use web-based chat and Q&A functionality an easy way to communicate with presentation moderators or even communicate among each other during presentations, allowing for a most effective online meeting.

Benefits to Your Organization	<ul style="list-style-type: none"> • Optimize existing conference calls with remote offices and remote workers by adding online, real-time presentations and collaboration • Simple point and click web-based system easy enough for any employee to use • Keep your teams on the same page by using GlobalConference for regular company meetings • Record your meetings for future reference • Issue optional passwords for conference and record playback access
